Manual brakes and BBK RX7 front brakes are a common cheap upgrade to the front of E30s. But they aren't a complete solution. Massive makes an adapter bracket to physically remove the booster. But those two mods alone won't give back the factory braking effort. I tried using a VW beetle (17mm) master cylinder.

I was wondering if anyone could link me

Access Free E30 Manual Brake Conversion

a video or a write on a manual conversion on a RHD e30 as all the ones that i have found are for LHD. Im sure they aren't too different. From all the write ups and videos i've seen they use the brake fluid reservoir to bleed the clutch but for LHD there is a seperate clutch fluid reservoir which has a soft line to the master cylinder?
