Preset Manual

I've shot, for a number of years, in a natatorium that has a mixture of filtered sunlight, sodium-vapor, and fluorescent lighting. My back-up body, D3200, nails the preset manual white balance every time (with either the 18% gray card, a white card, or just pointing it at a white wall). But the D7100 struggles to get it correct.

D7100 Preset Manual White Balance - Nikonites

You use this setting with a white or gray card to get perfect color matching. The D700 can recall five settings: just hold "WB" and spin the front knob after choosing PRE with the rear knob. You need to use menus, explained later, to save the five settings. I never use an actual card.
