These help pages are only for MediaWiki wiki software. Many MediaWiki-powered wikis have a help link that points to this page. If you came here from another wiki looking for help not related to MediaWiki software, we are not able to help you.

Help:Contents - MediaWiki

This page explains the image syntax when editing the wiki. You or another user must usually upload an image before you can use it on a page.. Images that are stored on a MediaWiki server are usually rendered by using the File: namespace prefix (but the legacy Image: namespace prefix is still supported as a synonym) as the target of a MediaWiki link. The alternate Media: namespace prefix is ...

MediaWiki - OU Create Documentation

Templates are a very powerful feature of MediaWiki, but can be confusing to new users and even experienced users can have difficulty making sense of the more complex ones. Templates should therefore be accompanied by documentation to improve usability. Template documentation should explain what a template does and how to use it.

Wikipedia:Template documentation - Wikipedia

Page Forms (known before 2016 as Semantic Forms) is an extension to MediaWiki that allows users to add, edit and query data using forms. It was originally created as an offshoot of the Semantic MediaWiki extension, to be able to edit templates that store their parameters via SMW, which is why it was originally called "Semantic Forms". However, it can now also work with the alternative Cargo ...
