number. For example, take 21 / 26 and plug it into the calculator as  $21 \div 26$ .

### **How to Calculate a Test Grade (with Pictures) - wikiHow**

To calculate the percentage of a specific number, you first convert the percentage number to a decimal. This process is the reverse of what you did earlier. You divide your percentage by 100. So, 40% would be 40 divided by 100 or .40.

### **How to Calculate Percentages - dummies**

If you reach your number exactly, the percentage you got to is your answer! If the 'part' number is halfway between two of your answers, split the difference. For example, you know that 20% is 36 and 30% is 54. 45 is halfway between 36 and 54, so the percentage is halfway between 20 and 30: 25%. This is your answer.
