SOLUTIONS TO SELECTED PROBLEMS FROM RUDIN 3 $X^* := \cup_{n=1}^{\infty} X_n$ yields a countable dense subset. Therefore, X is sep-arable (see pbm. #22) which shows that it has a countable base (see pbm #23). Gee, that was fun. I see it takes a lot longer to type these problems up in LATEX rather than by hand, but I think it'll be a useful tool for me to learn anyway.
